

***** **Consultants, Senior Consultants, Principals** *****

tpgroup plc is comprised of two complimentary business units:

- **Technology & Engineering.** Design, deliver and support high-integrity systems from our facilities in Portsmouth and Manchester. Engineering teams apply advanced techniques to produce solutions for our customers which can be relied upon for long service life, in difficult or dangerous environments. These include: atmosphere control systems for nuclear submarines and thermal management systems for chemical processing and energy industries.
- **Consulting and Programme Services (CaPS).** Provide through life services to enable our clients to manage the evolution of their own systems and services, in their own domain. Leveraging our 75 years' experience of designing, delivering and supporting safety, mission and business critical systems, we provide individuals with domain leading knowledge, skills and experience who can work within client teams or take full responsibility for the delivery of outcomes.

Who are we looking for.....

CaPS are seeking professionals with 3 – 7 years' experience of one or more of the following roles, in either: Defence, Energy, Communications & Intelligence or Space sectors.

- Business Analysis
- Business Change
- Cost Engineering
- Enterprise Architecture
- Operational Analysis
- Project Controls
- Programme and Project Management
- Requirements Management
- Risk Management
- Software Engineering
- Systems Engineering

Successful candidates will:

- Be able to work individually, or as part of a multi-disciplinary team
- Demonstrate strong communication skills (both verbal and written)
- Be enthusiastic and self-starter with a willingness to continue knowledge development
- Be able to build strong relationships with stakeholders, based upon **tpgroup** core values
- Be able to communicate complex concepts and solutions in a compelling and straightforward way
- Be pragmatic, able to tailor approach commensurate with project context

- Consider solution holistically i.e. across the lifecycle, and from a business, operational and technical perspective
- Be willing to challenge existing business processes, organisation structure and governance framework
- Have a degree/HND in a numerate discipline such as: engineering, maths, physics, economics, etc.
- Be willing to complete degree and/or apply for chartership status (with support from tpgroup)
- Be based within 1 hrs commute of our offices in either: Bristol, Fareham, Farnborough or Wincanton
- Be willing to travel across UK and overseas in delivery of consulting services
- Hold UK security clearance or be in a position to obtain UK security clearance to a minimum of SC level with no restrictions
- Hold valid UK driving licence.

About Us

tpgroup plc is a professional services and technology partner to global, defence, energy, space and intelligence & communications programmes.

Because of our forward-thinking teams, mission-critical equipment operates effectively in the world's most challenging environments. Whether sharing innovative solutions or manufacturing advanced systems, absolute trust is core to all we do.

We advise and consult on secure information systems, high-tech projects and through-life equipment support. Working with system integrators, Original Equipment Manufacturers (OEMs) and end-users, we bring brilliant ideas to life.

Our experience spans critical equipment and systems in many sectors; we are involved in everything from secure communications systems, and mission systems software to aircraft cockpit integration.

You'll also find us working on Autonomous vessels, high-integrity equipment of refineries and power stations, and even atmosphere management systems to protect submariners.

Company benefits include:

- 25 days' holiday
- Discretionary annual bonus scheme
- Company pension scheme
- Life Cover

To apply for this role, please send a CV and a covering letter detailing your current salary and benefits package to hr@tpgroup.uk.com
